Chief, D/CG

Information gathered at AAG Meeting, Dallas, Texas,  
18-21 April 1960

1. The items of information presented in this memorandum were gleaned by members of the Geography Division and are passed on as of possible interest to the Map Library Division.

2. William R. Mead, University College, London, presented a paper on Finnish Problems of Settlement. In the course of his discussion he mentioned that the Finns are preparing a new map of post-war agricultural settlement in Finland, based on more complete data than hitherto available. It is understood that this map will be available at the IGU meeting in Stockholm. Sheets of the National Atlas of Finland will also be available at Stockholm, it was stated.

3. Norman J. G. Pounds of Indiana University presented a paper on Land Use in the Hungarian Plain. Included in the presentation were slides of a series of maps of land use for Hungary based on 1940 data. It was not made clear whether or not Professor Pounds intends to publish these maps. A set of them would be desirable, however, as furnishing data to compare with recent production data under the Communist regime.
